

Simulated Verification 2. Contact

Problem Analysis

- ✓ Generate a function to return the person with the largest number among those contacted the last when the emergency contact network and the person to begin contact are given.
- ✓ The emergency contact network is shown below.

Input

```
int data[300]; // emergency contact data
                // stored in the sequence of {from, to, from, to, ...}
                // The sequence is meaningless.
                // Same {from, to} pairs can repeat.
int startNum; // number of person beginning the contact
```

Output

- ✓ The person with the largest number among those who are contacted the last

16508246
